

APMG PROJECT PLANNING & CONTROLS (PPC) Practitioner 2-day

APMG Project Planning & Controls (PPC)

Effective planning and control requires an understanding of a clear project definition, supported by a robust approach to planning the project. This, in turn requires the selection and use of appropriate scheduling techniques which are supported by rigorous monitoring for effective proactive control.

The APMG Project Planning & Control course supports the publication of the APM's guide, 'Planning, Scheduling, Monitoring and Control – The Practical Project Management of Time, Cost and Risk.

Our APMG PPC training contains everything a candidate need to gain their APMG PPC Foundation & Practitioner accreditations.

APMG PPC Practitioner – 2 days

Successful APMG Project Planning & Controls Practitioners can demonstrate they have achieved the knowledge and skills to apply the tools and techniques to work successfully in a Project Support or Planning & Controls Team.

This two-day event focuses on the selection and use of appropriate scheduling tools and techniques which are supported by rigorous monitoring for effective proactive control.

A sound basis for effective record keeping will facilitate the understanding of lessons learned which supports continuous improvement, thus adding value to organisational aspirations and objectives.

Who is it for?

This Project Planning & Controls Practitioner course would benefit those individuals having successfully gained the Project Planning & Control Foundation qualification and now looking to obtain the necessary skills to effectively apply project planning and controls method to their projects

Pre-requisites

Delegates attending this course will need to have attended and successfully passed the APMG Project Planning & Controls Foundation examination.

Delegates are required to have a copy of the APM Planning, Scheduling and Control Manual. This would have been provided on the Foundation course - otherwise, the ISBN is: 978-1-903494-44-8. Delegates must bring this book with them to the course.

Learning Objectives

After recap and consolidation of the APMG PPC Foundation learning content, and upon completion of this classroom course, delegates will learn and understand:

- The approaches and key products used to gain a clear definition of a project
- The approaches and techniques used to plan and close a project
- The scheduling techniques and appropriate presentation of the outputs
- The management of risk in the planning, execution and evaluation of a project
- The practices and data used for rigorous monitoring to enable proactive control of the project.

How is PPC Practitioner Certification assessed?

Your exam will be:

- Objective Multiple Choice
- 8 questions per paper, 10 marks available per question
- 40 marks or more required to pass (out of 80 available) - 50%
- Three-hour duration
- Open book (Project Planning & Control Guide only).

Delegates will, throughout the course, be exposed to numerous examples of examination questions, exercises and 'question-and-answer' sessions that will help to consolidate the learning. Thereby ensuring that delegates are more than adequately prepared for the exam.

What is included in this course?

- Official APMG Project Planning & Controls Practitioner Exam
- Project Planning & Controls Courseware
- Pre-course Material
- Completion Certificate
- Experienced Instructor

Group Courses

Group courses can be delivered on-site at your premises or at a local venue. In-house training offers advantages over booking public courses including:

- Cost savings
- Avoidance of travel expenses
- Tailoring to meet specific needs.
