

ECITB Introduction to Project Controls (3-days)

The Engineering Construction Industry Training Board (ECITB) is the skills, standards and qualifications body for the development of the engineering construction workforce of Great Britain.

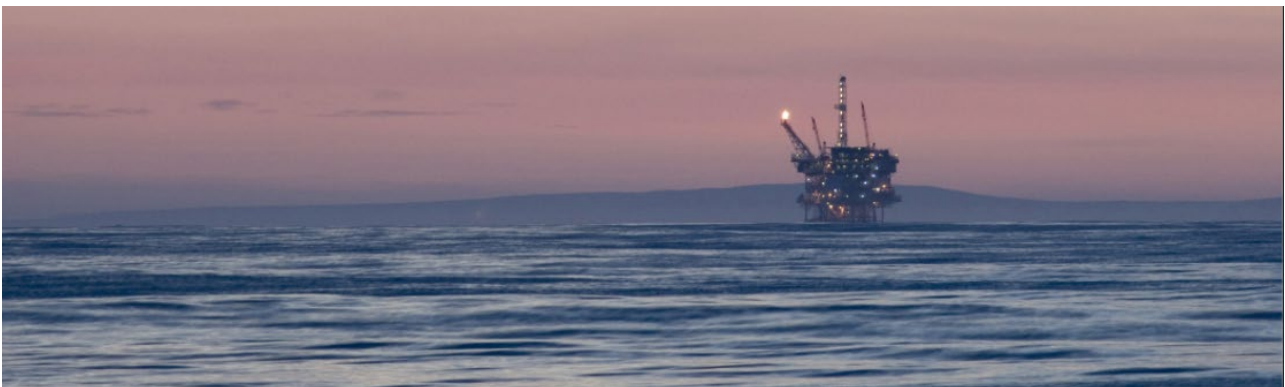

Our ECITB courses develop and qualify the project controls and project management professionals operating in the engineering construction environment.

ECITB Introduction to Project Controls

This three-day course enables students to gain a sound foundation in project control tools and techniques.

The course provides a comprehensive and detailed insight into the fundamentals of project control including planning, estimating and cost engineering. Delivered as a workshop using worked examples and case studies it will give students the skills and understanding to improve their project control performance using a range of best practice tools and techniques, thereby improving their confidence and capability in the role.

Who is it for?

This course is ideal for those who are new to project controls or those project practitioners with little or no formal training in the subject of best-practice project controlling or project management.

Pre-requisites

There are no formal pre-requisites for attending this course. Although some experience within a project environment is advantageous.

Learning Objectives

By attending this course delegates will be able to:

- Appreciate project processes and lifecycles for projects and project management
- Recognise the importance of developing effective teams, communication techniques and stakeholder management
- Use critical path analysis techniques and manage resource conflicts
- Contribute to the development of the business case and project execution plan
- Understand how to identify and manage project risks
- Select and apply appropriate project monitoring and control methods
- Use a systematic approach to analysing and planning a project
- Apply work breakdown structures and map project roles and responsibilities
- Understand the importance of procurement within many projects
- Appreciate the importance of effective project information management
- Appreciate the context and relevance of project change control processes
- Understand the importance of handover at the end of a project.

How are candidates assessed?

There is no formal examination. A Certificate of Completion will be provided.

What is included in this course?

- Highly experienced Instructor
- All courseware & classroom materials
- Pre-course reading
- Completion Certificate

Group Courses

Group courses can be delivered on-site at your premises or at a local venue. In-house training offers advantages over booking public courses including:

- cost savings
- avoidance of travel expenses
- tailoring to meet specific needs.

- ✓ **Funded training for ECITB members**
- ✓ **Modular courses delivered globally**
- ✓ **Training delivered by specialists**
